## SECTION 4 — CERTIFICATION

The above-named driver has indicated that they have a medical condition that interferes with the ability to operate an IID as required by law. To operate an IID, the driver is required to provide a minimum breath sample of 1.5 liters of breath for the initial test and for additional random retests throughout the duration of travel.

Based on the driver's health history and current medical condition, it is my professional opinion that they are unable to meet the minimum breath sample requirements to operate an IID (*please initial*). \_\_\_\_\_
